Attn: OET Dept.

Ref: FCC Class II Permissive change for FCC ID: APIBOX110

Applicant: Harman International Industries, Inc.

Dear Examiner,

This is to request a Class II Permissive change for FCC ID: APIBOX110 originally granted on 02/25/2022 (date).

The change under this application as following:

Changed DAC IC (U4, U10, U26) from PCM5121 to CS4353 (U40, U41, U22) with different package for alternative use.

Class II Permissive change: Change the non-RF components on the mainboard. The above changes don't affect the wireless module. This change based on engineering judgment that only Radiated Emission (below 1 GHz) and Power Line Conducted Emissions need to test. There is no RF parameter change to the operating frequency band, rated radiated and conducted output power of the device.

I attest that the certified device will not be capable of ad-hoc mode operation outside of the grant conditions.

Sincerely,

Signature *Terry Shi*
