FCC Part 15 Certification

To Whom It May Concern:

The major change filed under application is:

Compared with the original case, added IC (Mode: IC-AWBB298-QFN), diode and capacitor, the capacitor is changed to SMD type, this change doesn't influence the RF performance.

Hardware modifications to the certified product that affect fundamental RF characteristics (mainly effect radiated spurious emission, not effect power, PSD, conducted spurious emission, bandwidth) and degrade the unwanted emissions of the product;
