RE: FCC ID: APV-1300MB, Declaration for reuse of reports

To Whom It May Concern,

We, CalAmp Corp., are filing for our own FCC ID (APV-1300MB), utilizing a Quectel BG95-M3 module (FCC ID: XMR201910BG95M3).

We are using original test reports and declare these test reports accurately represent CalAmp's conditions of use, ensuring the antenna is of the right type and gain. No alterations of the module were made. It is identical to the original configuration.

On the next page please see the list of reports used for this certification. They include Report #, FCC ID or IC ID and the Model # of the Quectel module used.

Please contact me if there is any information you may need.

Sincerely,

Sr. Manager, Certification
