Re: FCC ID: APV-BRD01
        IC: 5843C-BRD01
        M/N: BRD01

Dir Sir and Madam,

The BlueBoard is a Bluetooth Module that supports Classic BT and BLE (dual-mode). It is designed to be added into CalAmp devices (LMU/TTU) as option when Bluetooth connectivity is required. The Blueboard is an RF module specifically for our LMU and TTU devices. The EUT was verified installed in a LMU4230H, this host is representative worst case of the devices in the LMU and TTU family. As such, labeling the EUT is not practical because of its physical size. Labeling information (including FCC ID and IC number) could be found in the User Manual exhibit.

Sincerely,

Product Certification Manager   Imad Rizk
