Dear Sirs,

Sharp Manufacturing Company of America requests certification for the subject models under Part 18 of the FCC Rules. Enclosed you will find a completed FCC Form 731 and supporting exhibits. A list of exhibits is included directly behind the FCC Form 731. This letter is to add the 2M248 and 2M253 Magnetrons by Toshiba to a FCC application that was filed in November but has not yet been approved.

If you should have any questions concerning this application please contact myself, (901) 367-5150 or Mr. Steve Petruska, (201) 529-9689. Thank you.

Sincerely,

Derek Shannon

PURPOSE OF FILING

The purpose of this filing is to request certification for a new model family of microwave ovens. The output power for this model family is 1200 Watts as measured by the IEC 705 method, 1988 revision. These models are cord connected counter top / built in Microwave Ovens. The Magnetrons used with these models have been used on previously certified products. The power transformer is a new design. The chassis design and waveguide are similar to the design for models listed under FCC ID APYDMR0122. There are some modifications in the dimensions of the cooking area.
