POE & DC IN POWER SUPPLY
This power supply is designed for use in a rack-mounted system. It is not intended for use in a portable or mobile environment. It is not intended for use in a hazardous or explosive atmosphere. It is not intended for use in a corrosive or high humidity environment. It is not intended for use in a high vibration or shock environment. It is not intended for use in a high temperature environment. It is not intended for use in a high pressure environment. It is not intended for use in a high altitude environment. It is not intended for use in a high speed environment. It is not intended for use in a high frequency environment. It is not intended for use in a high magnetic field environment. It is not intended for use in a high electric field environment. It is not intended for use in a high radiation environment. It is not intended for use in a high electromagnetic interference environment. It is not intended for use in a high electromagnetic compatibility environment. It is not intended for use in a high electromagnetic susceptibility environment. It is not intended for use in a high electromagnetic emission environment. It is not intended for use in a high electromagnetic absorption environment. It is not intended for use in a high electromagnetic reflection environment. It is not intended for use in a high electromagnetic refraction environment. It is not intended for use in a high electromagnetic diffraction environment. It is not intended for use in a high electromagnetic scattering environment. It is not intended for use in a high electromagnetic absorption environment. It is not intended for use in a high electromagnetic reflection environment. It is not intended for use in a high electromagnetic refraction environment. It is not intended for use in a high electromagnetic diffraction environment. It is not intended for use in a high electromagnetic scattering environment.
