Federal Communications Commission
Authorization and Evaluation Division
7435 Oakland Mills Rd.
Columbia, MD. 21046

Date: Feb. 22, 2001

Attention: Authorization and Evaluation Division

Subject: **Class II Permissive Change/17" Color Monitor, FCC ID: ARSCM761U**
Original granted on Jan. 24, 2001.

Dear Sirs:

This letter serves as our explanation that the subject certified product change is to change its video IC circuit. Below listed some modifications on the sample submitted for testing. We declare that the same will be implemented into all production units to enhance compliance of the units to FCC limits. The FCC ID label and User Manual remain unchanged.

The modifications include the following:

1. Added two ferrite cores on the video cable – one in the inside and one in the outside of the monitor. (see photo 2 & 5)
2. Added metal cover on the rear side of CRT board and it was connected to chassis by eight ground wires. (see photo 5 & 6)
3. Added a ferrite core on the harness of focus wires and G2 wire with 1 turn. (see photo 7)
4. Added aluminum foil connecting CRT tube to FBT's heatsink. (see photo 6)

If you have any further questions or comments regarding the above, please don't hesitate to contact Mr. Mike Su of ADT Lab. at fax No.: 886-2-2602-2943 or E-mail: mike@mail.adt.com.tw

Sincerely yours,

Frank Yang / R&D Project Manager
