Date: Sept. 26, 2001

Attention: Authorization and Evaluation Division

Subject: **Class II Permissive Change/15" LCD Monitor, FCC ID: ARSTF1560E**
Original granted on July 22, 1999.

Dear Sirs:

This letter serves as our explanation that the subject certified product change is to add one IC on motherboard. Below listed some modifications on the sample submitted for testing. We declare that the same will be implemented into all production units to enhance compliance of the units to FCC limits. The FCC ID label and User Manual remain unchanged.

The modifications include the following:

1. Added two ferrite cores on the video cable – one in the inside and one in the outside of the monitor. (see photo 6 & 8)
2. Added metal cover on the component side of the logical board and the inverter board for EMI. (see photo 9)
3. Added a ferrite core on the wire connecting control board and logical board. (see photo 10)
4. Added two ferrite cores on the wires connecting logical board and LCD panel. (see photo 11)
5. Added copper foils on the four sides of the LCD panel for EMI. (see photo 14)

If you have any further questions or comments regarding the above, please don't hesitate to contact Mr. Jonson Lee of ADT Lab. at fax No.:886-2-2602-2943 or E-mail: jonson_lee@mail.adt.com.tw

Sincerely yours,

Frank Yang / R&D Project Manager
