

EXHIBIT 4

Section 2.1033 (c)(9) TUNE-UP PROCEDURE

Turn-up procedure over the power range, or at specific operating power levels.

Response

The Alcatel-Lucent AWS MRO 2x1W, subject of this application, cannot be “tuned-up” by the user. There are no user tune-up features. All tuning, which verifies all units to have a maximum power of 30dBm \pm 0.5dB at the antenna terminal, is performed by the manufacturer during, and as part of, the manufacturing process
