Dear Sid Sanders:

On behalf of Lucent Technologies, I hereby request that the following exhibits, included in this Application for Certification, under FCC ID: AS5ONEBTS-05, covering the Lucent Flexent® UMTS OneBTS™ Macrocell W1900M, Model SD-2R521-01, wireless base station transceiver system be maintained as confidential information and not be made available for public inspection at any time.

- Exhibit 5: Internal Photographs**
- Exhibit 7: Operational Description (Theory of Operation, Functional Description)**
- Exhibit 8: Block Diagrams**
- Exhibit 9: Schematic Diagrams**
- Exhibit 11: UMTS Flexent® OneBTS™ Macrocell +24V Indoor Operation, Administration and Maintenance**
- Exhibit 13: Parts List, if Applicable**

These exhibits contain Lucent Technologies proprietary information that is considered to be trade secrets, with possible patents pending, and the property of Lucent Technologies, pursuant to the provisions of Part 0.457(d) of the Commission's Rules. These exhibits also contain design information that is highly proprietary to Lucent's contracted manufacturer/supplier.

Exhibits 5, 7, 8, 9, and 13 are highly proprietary and contain critical design information that can not be made available for public inspection. This information is proprietary both to Lucent Technologies and to Lucent's contracted manufacturer/supplier.

It is critical that all **internal photographs (Exhibit 5)** be held confidential because they reveal component ID numbers, component values and operating frequencies that are proprietary to the design of the circuit pack. When the equipment cabinet is installed on a customer's site, the only access is a single door on the cabinet front, which is kept locked at all times. Access to the installation site is limited and restricted, and is kept locked and secured by our customer.

The **UMTS Flexent® OneBTS™ Macrocell +24V Indoor Operation, Administration and Maintenance** document, included in **Exhibit 11**, is not furnished to the user, except under very exceptional and very limited circumstances. This manual contains highly proprietary circuit, equipment and architecture descriptions that must not be made available for public inspection. The cover/title page is explicitly labeled "*Unpublished and Not for Publication*".

Thank you for your consideration in this matter.

Sincerely,

Rudolf J. Pillmeier
