

**EXHIBIT 11: TUNING PROCEDURE, IF APPLICABLE****Part 2.1033 Application for certification.**

(c) Applications for equipment other than that operating under parts 15 and 18 of the rules shall be accompanied by a technical report containing the following information:

**(9) Tune-up procedure over the power range, or at specific operating power levels.**

User tune-up procedure over the power range, or at specific operating power levels, is not applicable for this product (NA). Alcatel-Lucent's -48V WCDMA **RRH2X60-850** twin Remote Radio Head product can not be "tuned-up" by the user. There are no user tune-up features. All tuning is performed by the manufacturer during, and as part of, the manufacturing process.

The maximum single carrier RF power requirement specifications used in the manufacturing process are:

Across the spectrum for all operating conditions and environments	47.8 dBm $\pm$ 0.75 dB
Across the spectrum at nominal conditions	47.8 dBm $\pm$ 0.50 dB
