

**EXHIBIT 4****Section 2.1033 (c)(8) DC VOLTAGES AND CURRENTS**

The dc voltage applied to and dc currents into the several elements of the final radio frequency amplifying device for normal operation over the power range.

**Response**

There are no changes or modifications in the hardware of the 850 RRH 2x60W from UMTS application to LTE application. The description on the dc voltage applied to and dc currents into the final radio frequency amplifying device for normal operation over the power range of the 850 UMTS RRH 2x60W Distributed Base Station, submitted in the initial FCC certification application for UMTS application under the AS5ONEBTS-26 which was granted on March 26, 2012, are still valid for the 850 LTE RRH 2x60W Distributed Base Station.

**Section 2.1033 (c)(9) TUNE-UP PROCEDURE**

Turn-up procedure over the power range, or at specific operating power levels.

**Response**

The Alcatel-Lucent 850 2x60W RRH, subject of this application, cannot be "tuned-up" by the user. There are no user tune-up features. All tuning is performed by the manufacturer during, and as part of, the manufacturing process.
