

EXHIBIT 6

Section 2.1033 (c)(10) CIRCUITRY AND DEVICES FOR SUPPRESSION OF SPURIOUS RADIATION

A description of all circuitry and devices provided for suppression of spurious radiation.

Response

There are no changes or modifications in the hardware of the 1900 RRH 2x60W from UMTS application to LTE application. The description of the circuitry and devices provided for suppression of spurious radiation of the 1900 UMTS RRH 2x60W Distributed Base Station, submitted in the initial FCC certification application for UMTS application under the AS5ONEBTS-27 which was granted on March 30, 2012, are still valid for the 1900 LTE RRH 2x60W Distributed Base Station.
