Mr. Frank Coperich
Federal Communications Commission
7435 Oakland Mills Road
Columbia, MD 21046

Dear Mr. Coperich:

We have reviewed the subject Federal Communication Commission (FCC) application and have no objection to the type acceptance for the KK 165A very high frequency (VHF) transmitter (p/n 069-01033-0201), FCC ID: ASYKX165A.

Yaesu Musen Co., Ltd. should be aware that it is likely that aircraft will employ Global Navigation Satellite System (GNSS) receiver along with VHF transceivers. Without proper filtering of the VHF transceiver harmonic emissions (as per (draft) TSO-C37e), there is a potential for interference to be caused by the VHF transceiver to the GNSS receiver.

If you require any additional information, please contact Mr. Emile Edora, Spectrum Planning and International Division, at (202) 267-5764.

Sincerely,

A handwritten signature in black ink, appearing to read "Donald K. Willis".

Donald K. Willis
Manager for Spectrum Planning
and International Division
