The MCX1000A is considered a mobile device operating in the aviation services authorized under part 87 of CFR 47. Per 2.1091(c) of CFR 47, the equipment is categorically excluded from routine environmental evaluation for RF exposure prior to equipment authorization or use. The radiating structure for the device is mounted more than 20 centimeters away and located outside the aircraft. Due to the location of the antenna, normal operating conditions, and use the unit will satisfy the requirements for RF Exposure per CFR rule 1.1311.
