Subject: IntuVue RDR-84K K-Band Radar System (FCC ID: ASYRDR84K) technology export restrictions.

To whom it may concern,

The IntuVue RDR-84K K-Band Radar System is identified as an export restricted product per the Commerce Control List. As such export controls apply to the Hardware, Software, and Technology.

The applicable Export Control Classification Number (ECCN) for RDR-84K K-Band Radar System Technology is 6E002:

“Technology” according to the General Technology Note for the “production” of equipment or materials controlled by 6A

The Technology classification follows from the Hardware classification of 6A008.e:

Radar systems, equipment and assemblies, having any of the following (see List of Items Controlled), and “specially designed” “components” therefor.
e. Incorporating electronically steerable array antennas;

The applicable Software classification is 6D001:

“Software” “specially designed” for the “development” or “production” of equipment controlled by 6A004, 6A005, 6A008 or 6B008.

Due to these restrictions, it is prohibited to publish photographs, drawings, performance information, and any other technical data. Such publication constitutes an illegal export event.

Sincerely,

Dawn Gidner
Honeywell Avionics FCC Focal
