Applicant: E F Johnson Company
Equipment: FCC ID: ATH2427240 EA98978
Subject: Correspondence 17644 Jan.9, 2001

Gentlemen: This is in reply to your questions, i.e.

Item 1. The device is considered to be a 'trunked portable radio' operating in the 430 to 470 MHz Band.

Item 2. The device is meant to meet ONLY Occupational Exposure limits. The instructions to user will reflect this. Please see amended Manual now uploaded to the Manual Exhibit.

Item 3. The device was tested for SAR at 100% duty factor.

Item 4. See corrections - Item 2.

Item 5. The Applicant reiterates: "We do not plan to offer any options with this radio that would allow the radio to be body worn with the belt clip".

Item 6. In view of the above, this is n.a.

Item 7. See attached label and location drawings.

We trust the foregoing now answers your questions and that the Grant will be issued A.S.A.P.

Sincerely yours,

MORTON FLOM, P. Eng.
