RE: FCC Identifier ATH7240

Dear Sir:

We respectfully wish to apply for a Class II permissive change for the above referenced FCC Identifier under the provisions of FCC rule 2.1043.

The original equipment certification was done with SAR test data supporting only a handheld operation. At that time there was no speaker/microphone option available for testing. It was further envisioned that none would be offered for sale. We have subsequently determined that there is a market need for such an accessory. In that light, we would like to request authorization for body worn operation using a speaker/microphone. In support of such a request, additional SAR testing was done, with the report submitted. No changes were made to the radio product, except for the addition of the speaker/microphone.

Your prompt attention to this matter is appreciated. Please let me know if there are any questions or if further data is required.

Sincerely,

John S. Oblak
