

SE-C7BTSE User manual

BT datas

Chipset :QCC3034

BT version:V5.0

Adjust Form:GFSK

Offer voltage:3.0-4.2V

Support BT agreement: A2DP,AVRCP,HFP,HSP

Working current $\leq 20\text{mA}$

Standby current $\leq 2\text{mA}$

Charging current :100mA

Wireless transmit distance:10 meter

Out power:MAX 6dBm

RF: -80dBm<0.1%BER

Frequency range :2.4GHz-2.480GHz

Signal to Noise Ratio:≥75dB

distortion factor: ≤0.1%

Temperature: 0°C to +45°C

1.Indicator

2 Volume+ / next chart

3. Volume- /previous chart

4. ON/OFF /play/pause

5. Usb 5 V Output

Feature:

- Enjoy music through Bluetooth
- Phone call with BT function
- Remote control music
- High sensitivity,omnibearing microphone design
- Apply for devices:with all BT mobile phone,iphone,Laptop Etc.

Pairing:red&blue light blinking

Pairing successful:blue light slow blink

Charging: red light on,full charge blue light on

FCC Statement

This device complies with part 15 of the FCC rules. Operation is subject to the following two conditions: (1) this device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

NOTE: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

The device has been evaluated to meet general RF exposure requirement. The device can be used in portable exposure condition without restriction.
