

ONKYO SOUND & VISION CORPORATION
2-1 Nisshin-cho, Neyagawa-shi, OSAKA 572-8540, JAPAN

March 10, 2011

Dear Application Examiner:

Onkyo Sound & Vision Corporation has developed a new model, UP-TR1, which is electrically and mechanically identical to a previously approved model, NS-RB1. The differences are cosmetic and relate to the speaker and stereo configuration, not the radio. The purpose of this Class II Permissive Change Application for FCC ID: ATMUPT1WL is to update the filing with additional photos showing the new model, UP-TR1.

Specifically the differences between the new model, UP-TR1, and the old model, NS-RB1 are:

- Silk printing of LEDs on top
 - Changed from "Subwoofer" to "Tx1"
 - Changed from "Surround" to "Tx2"
 - Changed from "Stereo" to "Tx3"
- Product name on the Screen Display is different (changed from NS-RB1 to UP-TR1)

The test report, RF Exposure, and all other exhibits submitted with the original application are representative of the new model.

Best regards,

Hirotaka Nakasa

Onkyo Sound & Vision Corporation
