"Tune-Up Procedures"

Exhibit D(1)-1

Tune-up procedure of the power level of JC215R

Connect a power meter to the antenna terminal.

1. Set the channel to 20.
2. Adjust VR101 to the point where the maximum power level is obtained.
3. Adjust L105 to the point where the maximum power level is obtained.
4. Adjust IFT106, L111 and L109 in the order so that the maximum power level is obtained.
5. Adjust L103, L104 and L105 so that the maximum power level is obtained.
6. Adjust VR101 again to the point where the power level should be 3.8 watts.
7. Confirm that the power level on both channel 1 and channel 40 is between 3.6 and 4.0 watts.
