

To: Greg Czumak  
Federal Communications Commission

From: Jim Sponsler  
Date: 9-11-98

Correspondence ID 3041 ; Ericsson AXATR-377-A2

A response to the request for additional information dated August 27, 1998 for the AXATR-377-A2 submittal is shown below.

- 1) The frequency range this device will tune to and is to be listed on the grant is: 824.04 to 848.97 MHz and 1850.2 to 1909.8 MHz.
- 2) The value we are requesting to be placed on the grant is 210 mw or 23.2dBm. The data for the mobiles supports this request given the 20% window.
- 3) At this point we are assuming there is no issue concerning the mobile's SAR information.

If you have any questions, please contact John Rothgeb or me.

Sincerely,

Jim
