

Exhibit 8 addendum

FCC Application Processing Branch

Re: FCC ID AXATR-389-A2

Applicant: Ericsson Inc

Correspondence Reference Number: 15555

731 Confirmation Number: EA98067

Below is our response as mentioned in correspondence 15555. The statement below allows us to meet the requirements for free trade and your concerns on the use of third party accessories. We plan to place this statement on an insert with the manual until we are able to use our existing stock of manuals. Future manuals will have the statement added into the safety section of the manual.

Body Worn statement

Before a phone model is available for sale to the public, it must be tested and certified to the FCC that it does not exceed the limit established by the government-adopted requirement for safe exposure. The tests are performed in positions and locations (i.e., at the ear and worn on the body) as required by the FCC for each model. Body worn measurements are made while the phone is in use and worn on the body with an Ericsson accessory. The design and composition of an accessory can affect the body worn SAR levels for the phone. Ericsson has not measured, and makes no representation about the body worn SAR levels when the phone is used with non-Ericsson accessories.

The placement of the above text will be placed in the safety section, pages 44 to 47, of the User Manual.

If you have any questions, feel free to contact me.
