Subject: Permissive change on FCC ID: AXATR-411-A2

Gentlemen,

Ericsson Inc. is submitting a class 2 permissive change as per 47CFR part 2.1043 for FCC ID AXATR-411-A2.

A design change was made to incorporate an internal antenna. The internal antenna replaces the stub antenna presently being investigated

During our testing with the internal antenna we found some slight degradation with the conducted and radiated spurious emissions. The spurious data along with the radiated power and SAR information has been included for your review. All other requirements were found equal to or better than the original submittal.

If you have any questions or concerns, feel free to contact me.
