

June 22, 2001

Federal Communications Commission
Authorization & Evaluation Division
7435 Oakland Mills Road
Columbia, Maryland 21046

Attention: Andy Leimer/Equipment Authorization Branch
Subject: Type Acceptance for FCC ID: AXATR-417-A2
Reference Number: 19546
731 Confirmation No.: EA100832

Dear Mr. Leimer:

The following are responses to the above correspondence reference number dated 6 June, 2001.

- 1) The internal photo exhibit now includes photos showing the component side of all boards. There are photos with the RF shielding in place as well as photos with the RF shielding removed.
- 2) Concerning Part 24's EIRP requirement, thank you for converting the submitted data from ERP to EIRP.
- 3) Exhibit 2 contains letters of attestation stating compliance to 911 Call Processing and ESN Security.
- 4) The preliminary user manual indicates two batteries, however, this product will only be marketed with the Lithium Ion battery which was the battery used for the SAR measurements/report. This correction has been made to the user manual and will be filed with the Commission when the final version of the manual is ready. The final version of the manual containing this correction will be submitted to the Commission prior to product launch to the market.
- 5) The additional information concerning RF exposure and unapproved Ericsson accessories is included in the "Product Care and Operation" section of the user manual beginning on page 4. On page 5 it is stated:

Only Ericsson original accessories are recommended.

And on page 6 it is stated:

Ericsson has not measured, and makes no representation about the body worn SAR levels when the phone is used with non-Ericsson accessories.

This information is also included in the SAR insert page.

I hope the Commission will find the responses and proposed action satisfactory for the issuance of the grant of equipment authorization for this product.

Sincerely,

Pierre Chery
