

Transient behavior of the transmitter.

-(5.1.9 (8.10) ESTI 300 113)

UHF radio

Time domain analysis of the power and frequency
(5.1.91)

Explanation of the test:

- Checking the frequency spectrum during Transmitter attack and release time
- Look at the ESTI 8.10 for more information.

Limits:

- While the power -30db below carrier power the frequency shift should not exceed $\pm 6.75\text{Khz}$ (see also the charts below)

Test configuration :
