Subject: Application for Class 2 Permissive Change to FCC Authorized Transceiver with FCC ID: AZ489FT4947

Dear Sir/Madam,

A permissive change is requested for the subject transceiver which is marketed in the United States and elsewhere.

A. DESCRIPTION OF PRODUCT CHANGES:

The BTLE chipset is End Of Life (EOL) and will be replaced with a new chipset which is non pin to pin compatible. There are no changes on the RF section, except a Compander IC and the surrounding passive component at audio section are removed.

B. PERFORMANCE DIFFERENCES:

EMC and EME have been assessed and no degradation was found, as compared to the previous filing but the data continues to be compliant to the FCC limits.

C. CONCLUSION:

This radio continues to meet all FCC emissions requirements for which authorization was granted.

Sincerely,

Arine Lee
FCC/IC Certification Manager
