Subject: Class II Permissive Change request for Certified Transmitter with  
FCC ID: AZ489FT5792 (iDEN models i500plus, i550plus and i700plus)

Dear Mr. Coperich:

Motorola Inc at 8000 West Sunrise Blvd, Ft. Lauderdale, Florida is requesting a Class II Permissive Change to the above Certified transmitter.

The changes are as follows: Internal traces on the Main Circuit Board were relocated, the resonator for the main VCO was changed to a leadless package and additional bypass capacitors were added to two regulator circuits.

Performance data on Radiated Spurious Emissions was obtained in accordance with 47 CFR 2.993. Revised Exhibit 6.4 attached shows that all Radiated Spurious Emissions are within FCC limits but exceeded those submitted to the FCC in the original filing. Thus prompting the request for a Class II Permissive Change request.

All other data including SAR on file with the FCC continues to be compliant.

If you have any questions in the interim, please contact me at 954-723-5793.

Sincerely,

Mike Ramnath  
FCC Liaison
