Re: FCC ID: AZ489FT5792, Confirmation Number, EA93655

Dear Dr. Chan:

In accordance with our discussions today, Motorola does not intend to provide, at this time, a leather carry case accessory for this radio product.

The user's guide for this product will include the following information approved by you and Frank Coperich at today's meeting:

Safety and General Information

To assure optimal radio product performance and make sure human exposure to radio frequency electromagnetic energy is within the guidelines set forth in the above standards, always adhere to the following procedures:

When using your radio product as a traditional two-way radio while making group or private calls with the Group/Private Speaker ON (no speaker icon visible in the display), hold the radio product in a vertical position with the microphone one to two inches (2.5 to 5 cm) away from the lips.

For body-worn operation, with or without an ear-piece or any other accessory, the antenna should be kept at least one inch (2.5 cm) from the body when transmitting. A Motorola plastic carry holder with a belt clip is available as an accessory to this radio product for body-worn use.

When using any data feature of the radio product, with or without an accessory cable, position the antenna of the radio product at least one inch (2.5 cm) from the body.

DO NOT hold the antenna when the radio is "IN USE". Holding the antenna affects call quality and may cause the radio product to operate at a higher power level than needed.

We appreciate the Commission's consideration of proper usage instructions for the leather carry case accessory and look forward to its timely resolution of that matter.

If you have any questions, please contact John Welch at 202-371-6916.

Sincerely,

Mike Ramnath
FCC Liaison
