

Dear Sir or Madam,

The Bluetooth module in AZ489FT7110 is identical to the Bluetooth module in FCC ID AZ489FT4900. The differences between AZ489FT7110 and AZ489FT4900 are the LMR board changes. The Bluetooth module has not been changed from the original filing. The grounding including all via interconnects in the region where the Bluetooth module is plugged in is identical to the original filing board. Thus, we would like to reuse the Bluetooth data from the original filing (FCC: AZ48FT4900/IC: 109U-89FT4900).

As far as the combined system is concerned, we took data to verify the interoperability and radiations patterns meet all FCC requirements.

We appreciate if you could advise us if this is acceptable to proceed for the FCC filing. Thank you for your consideration.

Best Regards,

Ong Ming Sooi
