Re: Class 2 permissive change request for FCC ID: AZ489FT7102

FCC ID: AZ489FT7102

Motorola Solutions hereby requests the addition of the following report to the FCC grant allocated to FCC ID AZ489FT7102 under a class 2 permissive change:

- **75939219-05 Issue: 01, FCC Testing of the Motorola Solutions Inc, LTE B14 Portable Infrastructure. Model: LXN 500 In accordance with FCC 47 CFR Parts 15 and 90 (Simultaneous Transmission).**

The above report is intended to provide evidence of conformance of 802.11 b/g and LTE modules to co-location requirements of FCC 47 CFR Parts 15 and 90.

This report is considered an addition and as such does not supersede any of the existing reports submitted as part of the original grant.

In addition, the following reports have been updated to remove references to a backpack scenario, which has been determined by the manufacturer to be outside the scope of this FCC grant:

- **75939219-02 Issue 7, FCC Testing of the Motorola Solutions Inc, LTE B14 Portable Infrastructure. Model: LXN 500 In accordance with FCC 47 CFR Part 15B**
- **75939219-01 Issue 6, FCC Testing of the Motorola Solutions LXN 500 LTE Band 14 Base Station In accordance with FCC CFR 47 Part 2 and FCC CFR 47 Part 90**

The request for class 2 permissive change applies to the addition of report 75939219-05, and update of reports 75939219-02 and 75939219-01 as detailed above. There are no hardware changes to be reviewed as part of this request.
