## WLAN MODULE UNIT

### Installation Manual

The module has two deferent type of connectors for embedding.

For embedding, the connectors are used for both mechanical and electrical connection.

Power supply and control signals are provided via connector DF40C-50DS-0.4V made by Hirose located on bottom side of module in Fig.1.

2 antenna connectors (U.FL-R-SMT(10) by Hirose) are located on top side of module in Fig.2

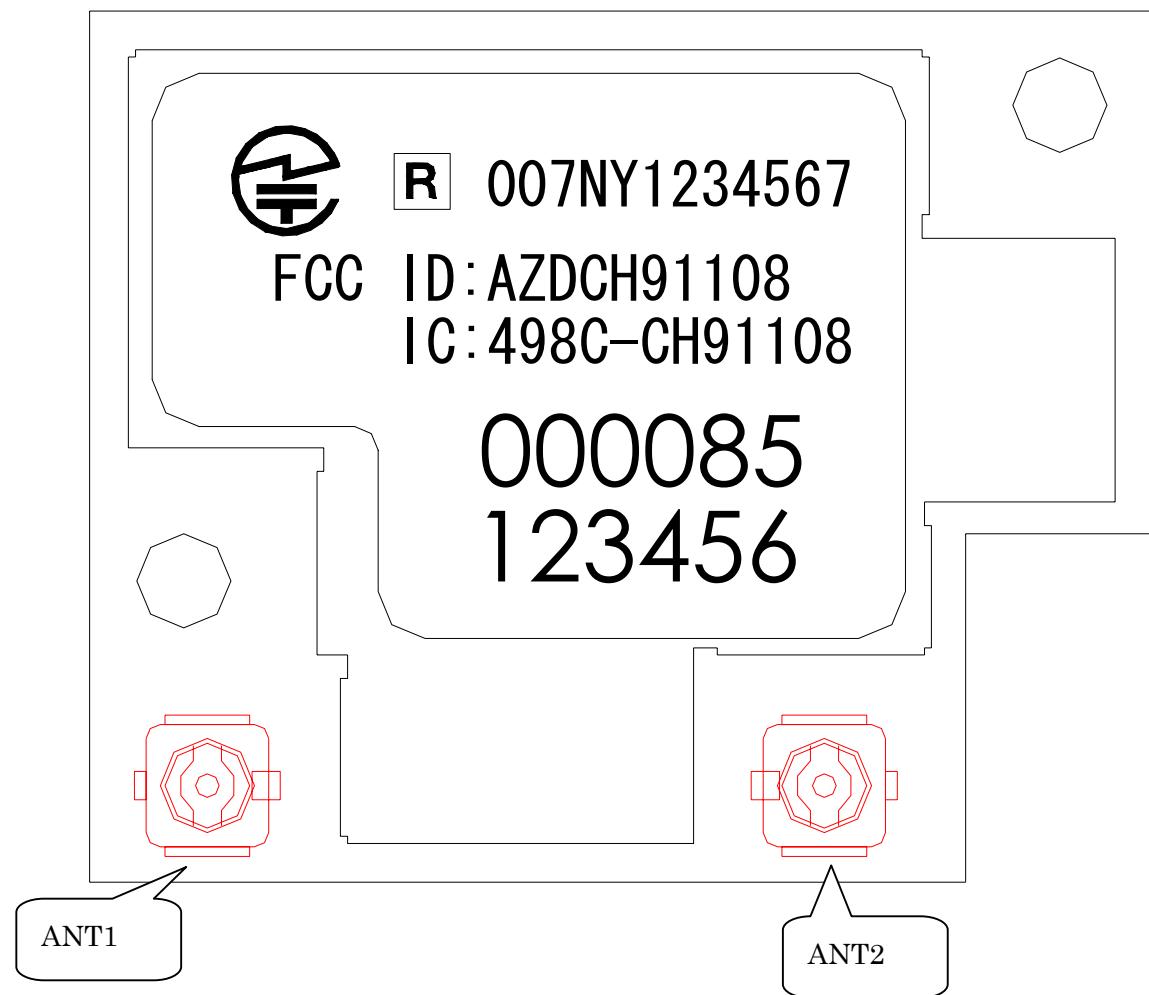

Fig.2 module outline (top view)

The 2 antenna connectors are named ANT1 and ANT2 as shown in Fig.2.

External antennas are connected to ANT1 or ANT2 or both via 50 Ohm Coaxial cable.

When only one antenna is used, non-used connector can be kept open.

## FCC WARNING

Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

## NOTICE

This transmitter must not be co-located or operated in conjunction with any other antenna or transmitter.

This device complies with Part 15 of FCC Rules and RSS-Gen of IC Rules. Operation is subject to the following two conditions: (1) this device may not cause interference, and (2) this device must accept any interference, including interference that may cause undesired operation of this device.

As well as above necessary FCC/IC statements, applicable RF Exposure statements are required for users manual of final product.

### **[For Portable Use]**

Example of RF Exposure Statement for portable equipment:

The available scientific evidence does not show that any health problems are associated with using low power wireless devices. There is no proof, however, that these low power wireless devices are absolutely safe. Low power Wireless devices emit low levels of radio frequency energy (RF) in the microwave range while being used. Whereas high levels of RF can produce health effects (by heating tissue), exposure to low-level RF that does not produce heating effects causes no known adverse health effects. Many studies of low-level RF exposures have not found any biological effects. Some studies have suggested that some biological effects might occur, but such findings have not been confirmed by additional research. (Model Name of final product) has been tested and found to comply with FCC/IC radiation exposure limits set forth for an uncontrolled equipment and meets the FCC radio frequency (RF) Exposure Guidelines in Supplement C to OET65 and RSS-102 of the IC radio frequency (RF) Exposure rules.

### **[For Mobile Use]**

This equipment complies with FCC/IC radiation exposure limits set forth for uncontrolled equipment and meets the FCC radio frequency (RF) Exposure Guidelines in Supplement C to OET65 and RSS-102 of the IC radio frequency (RF) Exposure rules. This equipment should be installed and operated with at least 20cm and more between the radiator and person's body (excluding extremities: hands, wrists, feet and ankles).

## Declaration of conforming to R&TTE requirement
