Test Setup

:30218 ATCB CommPhoto.pdf (225 KB)

Dear Dennis,

Please confirm following reply to your comment on 19Sep2003.

1. Since this device is for exclusive use in the Bubble Jet I80, why weren't radiated spurious emissions performed in the host?

-->This time our client request us to obtain FCC grant of this device as individual unit.

2. Please provide a separate test setup photo exhibit as required by the FCC.

-->Please find attached "Test Setup Poto.pdf".

3. The only Bandwidth measurement for FHSS devices is the 20dB bandwidth of 15.247 (a)(1).

Please explain what the plot on page 38 is for.

-->This page 38 is for IC application. IC requires 99% Occupied Bandwidth. We use same data so please just use it for your reference.

I saw on the news that Hurricane hit in your country was really huge one. Are you and your family OK?

I appreciate for your cooperation.

Best Regards,

Hi Keijiro
Hurricane Isabella is causing havoc on the East Coast. The server I
believe
is down due to power outage. I will be reviewing this application so I
will
take care of making sure it gets on the ATCB server.

I should have something for you Friday our time.

Thanks
Dennis

Dear Dennis,

Yesterday I submitted application form for CANON INC., Bluetooth Unit (FCC ID: AZDK30218). However, I forgot to submit Technical Specification. Today I tried to upload from ATCB website but I could not access to the website. Please upload attached file to ATCB website.

I appreciate for your cooperation.

Best Regards,
