RE: **Request for Class II Permissive Change**
FCC ID: **AZP FRD1201U-T2**

Please be advised that the following information is a list of modifications that will be included in the production process for the above-referenced equipment.

- In order to improve directivity, the antenna is changed into the metal wire antenna from the print pattern antenna.
- Attenuator is added
With change of the antenna, the attenuation circuit consisting of C103, C102, L101 and L102 is added to the antenna matching circuit on the logic board in order to make RF output power regulatory compliant.

Thank you for your attention to this matter.

Signatory

Johann Roidt
