RE: FUTABA Corporation of American

FCC ID: AZPT4YBF-72

After a review of the submitted information, I have a few comments on the above referenced Application.

- 1) Plug in crystals are not to be accessible to the end user. Please comment on if the cover that has been added is glued in or considered permanently installed.
- 2) The newly uploaded 731 form states that the emission designator is F3D, while the test report states F3E (page 26) and F1D (page 3). Please clarify which is correct and justify the nature of the signal modulating the main carrier.

Timothy R. Johnson
Examining Engineer

The items indicated above must be submitted before processing can continue on the above referenced application. Failure to provide the requested information may result in application termination. Correspondence should be considered part of the permanent submission and may be viewed from the Internet after a Grant of Equipment Authorization is issued.

Please do not respond to this correspondence using the email reply button. In order for your response to be processed expeditiously, you must submit your documents through the AmericanTCB.com website. Also, please note that partial responses increase processing time and should not be submitted.

Any questions about the content of this correspondence should be directed to the sender.
