RE: FUTABA Corporation of American

FCC ID: AZPT4YBF-72

After a review of the submitted information, I have a few comments on the above referenced Application.

- 1) Your last response stated that the emission designator should be F3D since the modulation signal is a digital signal. We agree that pulse position modulation would be considered digital, but the '3' in the emission designator denotes that the signal modulating the main carrier is analog. Shouldn't the emission designator be F1D. Please confirm.
