Request for Class II Permissive Change

June 13, 2018

Federal Communication Commission
Equipment Authorization Division
Application Processing Branch
7435 Oakland Mills Road
Columbia, Maryland 21046

FCC ID : B3Q-WLS5060B-D250
Applicant : Brother Industries, Ltd.

To Whom It May Concern:

This is to request a Class II permissive change for FCC ID: B3Q-WLS5060B-D250, originally granted on December 19, 2017(for DSS, DTS) and December 20, 2017(for NII).

We have obtained Modular Approval in Mobile configuration for this module. This time, it is used in the portable host devices (Mobile Printer, RJ-4250WB).

At the same time, the following points are also changed by the software of the host device.

- 802.11n-40 function of 2.4 GHz Wireless LAN is disabled.
- 802.11ac-20/ac-40/ac-80 function of 5GHz Wireless LAN is disabled.
- Output power of 5GHz Wireless LAN (802.11a/n-20/n-40) is reduced and it is tuned to operate at a lower power setting than the maximum power in order to ensure output power does not exceed the targets described in the SAR report.

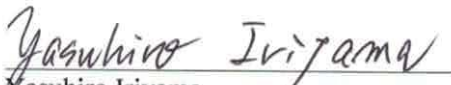

For details of this modification, please refer to the following documents.
There is no change before and after change except for these documents.

<input checked="" type="checkbox"/>	Test Report
<input type="checkbox"/>	RF Exposure
<input type="checkbox"/>	External Photo
<input type="checkbox"/>	Internal Photo
<input checked="" type="checkbox"/>	User Manual
<input type="checkbox"/>	Label drawing/ location
<input type="checkbox"/>	Block Diagram
<input checked="" type="checkbox"/>	Theory of Operation
<input type="checkbox"/>	Schematic Diagram
<input type="checkbox"/>	Parts List

This time, we performed SAR testing with the host devices and confirmed that this product still meets the minimum requirements of the applicable rules of FCC.

Thank you for your attention to this matter.

Sincerely,

Yasuhiro Iriyama
Brother Industries, Ltd.
