RE: FCC ID: B3QBCLD10A_ATCB004604
Attention:

I have a few comments on this Application. Please note that further comments may arise in response to answers provided to the questions below.

1. Please note that the device appears to operate in the 5.7GHz frequency range. Please explain why the bandwidth data table listed on page 4 of the data portion of the report states 2402-2480MHz. Please correct as necessary.
2. Please note that the latest interpretation from the FCC concerning placement of the 2-condition statement is "If the labelling area for the device is so small, or it is not practical to place the required statement on the device, then the statement can be placed in the user manual or product packaging - Section 15.19(a)(5). Generally, devices smaller than the palm of the hand are considered small." While the device may be handheld it appears to be larger than the palm. This then brings into question the validity of placing the 2-condition statement in the manual and not on the device. Please justify why the statement is not on the label.

The items indicated above must be submitted before processing can continue on the above referenced application. Failure to provide the requested information may result in application termination. Correspondence should be considered part of the permanent submission and may be viewed from the Internet after a Grant of Equipment Authorization is issued.

Please do not respond to this correspondence using the email reply button. In order for your response to be processed expeditiously, you must submit your documents through the AmericanTCB.com website. Also, please note that partial responses increase processing time and should not be submitted.

Any questions about the content of this correspondence should be directed to the sender.
