

UR28A Operational Description:

The UR28A is a 310 MHz Pulsed RF transmitter. It is used for remote control other X-10 home security devices. When the X-10 button is depressed, the remote control is put into RF mode. The operator can then turn on or off other X-10 modules and also set bright/dim on lighting. The device also acts as an infrared remote control for a television system. The UR28A is powered by 4 “AAA” batteries and fits in the palm of your hand.
