A United Technologies Company

6/10/2014

Federal Communications Commission

To Engineering Review:

Ref.: FCC ID B4Z-715A-2PANIC, Learn Mode Double Button Panic - Model 60-457-10-319.5.

Enclosed please find an application for approval of the referenced device per CFR 47 Part 15.231 for a low-power rf transmitter used with security systems.

When the buttons are depressed, a low power, amplitude modulated signal is sent to a security system which will respond with a local alarm and/or will send a message to a monitoring system depending on the system programming.

Transmit frequency is 319.5MHz.

Transmissions shall cease within 5 seconds of activation and uses the Duty Cycle Correction Factor as calculated in the Test Data and found in CFR 47 **§15.231 and §15.35(c)**.

If you have any questions or comments, please do not hesitate to contact me.

Sincerely,

Paul J Price
