Re: Application for B4Z-785B-ALTP

The product contained in this application uses the same circuit board, hardware design, and enclosure as the FCC approved product, Allegro security control panel (FCC ID: B4Z-785B-ALGRO). We've submitted this application due to differences between this product and the Allegro security panel in the following areas:

- FCC label/location
- Length of the longest transmission [§15.2319(a)(2)]
- Supervisory transmissions occurring at regular predetermined intervals [§15.2319(a)(3)]
- User Manual.
