

GE Interlogix

10/16/2002

The Dialogue Telephone Interface Modules is the same as the product previously approved by the FCC under the B4Z-786A-DTIM FCC ID number. The change that we did to the device was to switch from leaded components to surface mount components and to change the antenna. Enclosed are the Schematics, Test Report, User Manual, Operation Description, and Photos of the product.

Thank you,

Rick Conner
