## EXHIBIT I Operational Description

### Product Description

The product is a wireless Two Way Touch Pad used in conjunction with a wireless security alarm system. The Two Way Touch Pad can be used to arm, disarm, and check the status of the security alarm system.

This product is a transmitter manufactured by ITI. ITI has code imbedded in the microcontroller of the Two Way Touch Pad to control the transmitter.

The microcontroller used is a Mitsubishi, M38513E4FP.

The RF circuit consists of a 106.5 MHz oscillator followed by an amplifier. The amplifier is turned on and off to modulate the carrier.
