Subject: Certification for FCC ID: B5KBKRC16184-7

Gentlemen:

Ericsson AB requests a Grant of Certification (Type Acceptance) for the above-mentioned FCC Identifier.

This base station transceiver is designed for use in the GSM 800 MHz cellular telephone system. The transmitter will operate from 869 to 894 MHz. The receiver circuit supports 824 to 849 MHz. The base station operates in the 800 MHz cellular radiotelephone services as per 47 CFR Part 22 subpart H, 22.901 (d). It meets the requirements of GSM1900 11.10-1 version 4.19.1 specification for operation in GSM cellular systems except for the output frequency range.

This base station will in normal mode operate at a nominal power out 2.5 watts at the antenna connector. The power output is reducible to ~5 milliwatts. At the channels at the band and block edges (channels 128, 181, 231, 233 and 246) output power has to be reduced to 1 W in order to fulfill the requirement for occupied bandwidth at band and block edges.

Ericsson AB requests confidentiality under CFR 0.459. Confidentiality for the following exhibits is requested: Exhibit 5 CPU Part Schematics Exhibit 5 Radio Part Schematics

Justification of this request is in order to protect the large investment in developing this technology and to facilitate the circuit miniaturization utilized in this design and protect the innovative design as well as proprietary techniques which are implemented. In order to protect Ericsson's competitive advantage on these proprietary techniques, we request the above listed exhibits be held as confidential and withheld from the Public Information File.

If additional information is needed, please contact me on the below listed number.

Sincerely,

Palle Zetterstrand Verification Engineer Ericsson AB Flöjelbergsgatan 1B SE-431 84 Mölndal Sweden
