Subject: Complementary information for a Class II Permissive change of FCC ID: B5KDKRC1311004-2

Gentlemen;

Ericsson AB requests a Grant of Certification (Type Acceptance) for the above-mentioned FCC Identifier.

A new variant of the RBS 2206 cabinet is introduced. With this new version of the cabinet the Base Station is called RBS 2206V2. For RBS 2106 and RBS 2206/RBS 2206V2 a new Combiner and Distribution Unit, called CDU-K, is also introduced. This unit is a link in the TX radio path and will be a customer option to CDU-F and CDU-G already included in the existing Grant. CDU-K has the same output power as CDU-G. In order to fulfill the requirements in the band edges (channel 512 – 1930.2 MHz and channel 810 – 1989.8 MHz) the maximum output power in channel 512 and 810 has to be reduced to 38.0 dBm for both GMSK and 8-PSK modulation when CDU-K is used.

Ericsson AB requests confidentiality under CFR 0.459. Confidentiality for the following exhibits is requested:

Exhibit 8 Internal manuals

The Radio Base Station (RBS) is always installed and placed in an area with access only to authorize personal. Sensitive information, such as internal photos and manuals is not available for general public in any form. Only customer with a Non-Disclosure Agreement (NDA) in place will get access to sensitive information. So the only way a competitor could get technical information on the RBS is from FCC records.

We further certify that the applicant nor any party to the application is subject to a denial of Federal benefits, that includes FCC benefits, pursuant to section 5301 of the Anti-Drug abuse Act of 1988, 21 U.S.C. Section 862.

Ericsson AB accept by this request the agreement set out in the document "Bilaga SPCR 125 -Avtal om marknads kontroll för radioutrustning certifierad för USA-marknaden"

If additional information is needed, please contact me on the below listed number.

Sincerely,

Per Helmersson
