

## Declaration-MIF for HAC RF Interference Evaluation

To Whom It May Concern,

This device, with **FCC ID: B94HHF606V**, Hearing Aid Compatibility Requirement will be certified under ANAI C63.19-2011 version per Part 20.19.

The M rating was determined by measuring the maximum steady state average E-field values in dB(V/m) as documented in the HAC report and adding the MIF value in dB(V/m) using pre-determined values provided by Speag under UID 10021 DAB (14.10.2015) / UID 10011 CAB (14.10.2015).

Speag-reference documentation for supporting the pre-determined MIF value is Schmid & Partner Engineering AG, UID SUMMARY (Communication Systems for Calibration, Issued Date 2015/10/14).

We confirm that the Speag simulation provided represents all the air interface modes applicable for a HAC rating for this handset.

Sincerely Yours,
