APPENDIX I
RADIO FREQUENCY EXPOSURE

LIMIT

According to §15.407(f), U-NII devices are subject to the radio frequency radiation exposure requirements specified in §§ 1.1307(b), 2.1091 and 2.1093 of this chapter, as appropriate. All equipment shall be considered to operate in a "general population/uncontrolled" environment. Applications for equipment authorization of devices operating under this section must contain a statement confirming compliance with these requirements for both fundamental emissions and unwanted emissions. Technical information showing the basis for this statement must be submitted to the Commission upon request.

Calculation

Given $\quad E = \dfrac{\sqrt{30 \times P \times G}}{d}$ & $S = \dfrac{E^2}{3770}$

$\quad\quad$ Where $\quad E$ = Field strength in Volts / meter

$\quad\quad\quad\quad\quad P$ = Power in Watts
$\quad\quad\quad\quad\quad G$ = Numeric antenna gain
$\quad\quad\quad\quad\quad d$ = Distance in meters

$\quad\quad\quad\quad\quad S$ = Power density in milliwatts / square centimeter

Combining equations and re-arranging the terms to express the distance as a function of the remaining variables yields:

$$S = \frac{30 \times P \times G}{3770 d^2}$$

Changing to units of mW and cm, using:
$\quad\quad$ *P (mW) = P (W) / 1000 and*
$\quad\quad$ *d (cm) = d(m) / 100*

Yields

$$S = \frac{30 \times (P/1000) \times G}{3770 \times (d/100)^2} = 0.0796 \times \frac{P \times G}{d^2} \quad\quad \textit{Equation 1}$$

$\quad\quad$ Where $\quad d$ = Distance in cm
$\quad\quad\quad\quad\quad P$ = Power in mW
$\quad\quad\quad\quad\quad G$ = Numeric antenna gain
$\quad\quad\quad\quad\quad S$ = Power density in mW / cm2

Maximum Permissible Exposure

EUT output power = 70.47mW

Numeric Antenna gain = 1.88

Substituting the MPE safe distance using d = 20 cm into Equation 1:

Yields
$\quad\quad S = 0.000199 \times P \times G$
Where $\quad P$ = *Power in mW*

$\quad\quad\quad\quad G$ = *Numeric antenna gain*

$\quad\quad\quad\quad S$ = *Power density in mW / cm^2*

→ *Power density = 0.02636 mW / cm^2*
