Ref: FCC IDs B944965AGN, B944965AG and B94WM3945ABG

Dear Sirs:

We have requested the grants for the FCC IDs referenced above to be revised to allow user installation of these radio modules. The following additional information is being provided as requested:

HP implemented BIOS lock on all platforms starting in October 2003. All platforms that support WLAN mini-cards were shipped with BIOS lock. Therefore, there are no platforms that would accept these WLAN cards in the market that do not have the BIOS lock feature.

If you have any comments or questions, please feel free to contact me.

Sincerely,

Andrew St. Cyr
