SUBJECT: Cobra Electronics Corporation – FCC ID: BBO75WXSTA, CB radio Cobra model number 75WXST.

To whom it may concern:

By means of this document, Cobra Electronics Corporation declares the following differences between the original 75WXST– granted on 05/03/2001 and the revised hardware version:

What’s not changing –

Component	Comments
CB Receiver circuit section	
CB Transmitter circuit section	
Audio Amplifier circuit section	
Sound tracker circuit section	
Case	
Curl cord	
User interface and LCD display	
Junction box (antenna, DC input and ext speaker connections)	

What is changing –

System micro controller	The original micro controller is EOL. Cobra is no longer able to source this part to support production of the 75WXST.
Added Bekin IC	This chip supports the weather receiver function that’s part of the original design and supplies VCO for the CB RX/TX section.

Sincerely,

Chris deWaal  
Sr. Project Engineer  
Cobra Electronics Corp.
