

Cobra Electronics Corp 6500 West Cortland Avenue, Chicago, Illinois 60707

17 June, 2002

To Whom It May Concern:

The attached documents describe a proposed change to the transmitter circuitry for the Cobra Family Radio Service transceiver model FRS307C, FCC ID # BBOFRS307C.

This change is being made to reduce cost by removal of the transmitter buffer device (Q13) and to improve transmitter harmonic content by changes to the frequency selective elements in the remaining transmitter stages.

Cobra Electronics proposes and requests that these revisions be classified as a permissive change under FCC rules.

Sincerely,

Robert Mudra  
Engineering Manager
